# Ergonomics Consulting Services

### Ergonomics Consultation Services

CNA's ergonomics services are designed to assist our policyholders in developing and sustaining their ergonomics programs. Our team has the capabilities to serve as a resource for program development and provide collaborative consultation to develop effective solutions that address ergonomics risks.

### Services Offered

CNA Risk Control offers specialized and creative solutions that help policyholders reduce their exposure to ergonomics risk and improve the overall efficiency of their operations.

CNA's ergonomics service offerings include:

- Ergonomics program development and deployment for industrial and office environments
- Ergonomics program review and gap analysis to help policyholders improve and sustain their existing ergonomics programs
- **Motion is Money** process for construction and manufacturing
- Guidance on exoskeleton implementation and deployment for workforce
- Office ergonomics assessments
- Ergonomics assessments in the manufacturing, construction, life sciences and technology industries
- Ergonomics team development and mentoring
- Ergonomics training for employees
- Customized ergonomics training for managers, supervisors, engineers and executive leadership

CNA's ergonomics team utilizes ergonomics design principles, anthropometry and quantitative risk assessments to identify the most cost-effective and efficient solutions for our policyholders.

### Credentialed Professionalism

Our network of professionals brings cutting-edge industry expertise. Your business can count on CNA Risk Control to provide both breadth and depth of knowledge.

### Certified Professional Ergonomists

Certified Professional Ergonomist (CPE) is granted by the Board of Certification in Professional Ergonomics, and the CPE designation is recognized as the standard for practicing ergonomists. CNA Risk Control's CPEs oversee ergonomics work performed by CNA Risk Control. They provide a service framework for the Risk Control team and consult to develop and build custom solutions for our policyholders.

### Additional Designations and Degrees

Additional key designations include Associate Ergonomics Professional (AEP), Certified Safety Professional (CSP), Associate in Risk Management (ARM), the UL-awarded designation Recognized Risk Engineer (RRE), and B.S. and M.S. engineering degrees.
